

Text proposal related to respecting installations.

It is to be reminded that each owner/renter who will put their house /apartment for rent, must inform his insurance company in order to be covered for his seasonal renting activities.

In addition for each rent the owner must ask to each of his tenants a copy of their own public liability insurance for any damages that might be caused by the tenant.

For all deterioration of the common parts of the Domain the owner /renter only will be held responsible and as a result should contact and inform his insurance company for the damages for which he will be re- invoiced.
